

Wasi Mahin

Financial Systems Assistant

Long Beach, CA | wasimahin@gmail.com | [linkedin.com/in/wasi-mahin](https://www.linkedin.com/in/wasi-mahin) | github.com/wasimahin | wasimahin.com

SUMMARY

I keep the books for two university entities and automate the work behind them. Two Python tools I wrote run daily in Dynamics 365 Business Central, cutting invoice entry ~96% and journal entry up to 95%.

EXPERIENCE

Financial Systems Assistant — Associated Students, Inc., CSULB | Sep 2026 – Present

- Cut invoice entry ~96% (3–5 minutes to under 10 seconds) and manual journal entry up to 95% by building two Python tools that run daily inside Microsoft Dynamics 365 Business Central, with no API integration.
- Cut reporting-pipeline processing time 70–80% by building AI-assisted extraction, validation and reporting workflows in Microsoft Copilot.
- Keep the ASI and USU books audit-ready and secure by preparing journal entries and adjustments, supporting reconciliations, year-end close and budgets, and setting access controls on AI tools.

Lead Business Office Representative — Associated Students, Inc., CSULB | Feb 2026 – Sep 2026

- Raised office efficiency 50% by redesigning workflows adopted team-wide and training 3 new hires with SOPs.
- Kept 100% data accuracy across 500+ accounts by running monthly internal audits and preparing reconciliations for the 2025–26 external year-end audit.
- Processed 50–100+ vendor invoices a week (up to 200 at peak) for 500+ campus organizations by owning the accounts payable cycle end to end.

Business Office Representative — Associated Students, Inc., CSULB | Oct 2024 – Feb 2026

- Cut check-processing time 80% by implementing an upgraded financial system.
- Co-developed the 2025–26 ASI and USU operating budgets and reconciled statements for 20+ student organizations.

Business Analyst Intern (Project Microsoft) — Association for Information Systems, CSULB | Sep – Nov 2025

- Turned raw audience and performance data into executive-ready KPI dashboards for Microsoft presentations by building Power BI models (DAX) and Microsoft Fabric ETL pipelines.
- Shaped project strategy with correlation, SWOT and cost-benefit analysis, and co-delivered the pitch to Microsoft representatives.

LEADERSHIP

Vice President of Finance — Association for Information Systems, CSULB | May 2026 – Present

- Fund weekly workshops and semester events for a 100+ member organization by managing a \$5,000+ operating budget plus grant funding, allocated from spending analysis.

PROJECTS

- **Snehin Check Request Helper** — invoice automation — github.com/wasimahin/snehin-check-request-helper
- **BC Journal Entry Bot** — journal-entry automation — github.com/wasimahin/bc-journal-entry-bot
- **AIS Annual Datathon 2026, 3rd place** — Tableau analysis of income growth and regional inequality.
