Wasi Mahin

Financial Systems Assistant
Long Beach, CA | wasimahin@gmail.com | linkedin.com/in/wasi-mahin | github.com/wasimahin | wasimahin.com

SUMMARY

I keep the books for two university entities and automate the work behind them. Two Python tools I wrote run daily in Dynamics 365 Business Central, cutting invoice entry ~96% and journal entry up to 95%. Outside work, I designed and launched Tahúr, a browser card game with online multiplayer, built with Claude.

EXPERIENCE

Financial Systems Assistant — Associated Students, Inc., CSULB | *Sep 2026 – Present*

- Cut invoice entry ~96% (3–5 minutes to under 10 seconds) and manual journal entry up to 95% by building two Python tools that run daily inside Microsoft Dynamics 365 Business Central.
- Cut reporting-pipeline processing time 70–80% by building AI-assisted extraction, validation and reporting workflows in Microsoft Copilot.
- Keep the books for 2 entities (ASI and USU) audit-ready by preparing journal entries, account adjustments and reconciliations, and supporting year-end close and budgets.
- Protect confidential financial data for 2 entities by reviewing AI-supported tools for risk and implementing access controls, data-protection and internal-control safeguards.

Lead Business Office Representative — Associated Students, Inc., CSULB | *Feb 2026 – Sep 2026*

- Raised office efficiency 50% by redesigning workflows adopted team-wide and training 3 new hires with SOPs.
- Kept 100% data accuracy across 500+ accounts by running monthly internal audits and preparing reconciliations for the 2025–26 external year-end audit.
- Processed 50–100+ vendor invoices a week (up to 200 at peak) for 500+ campus organizations by owning the accounts payable cycle, from intake and GL coding to journal entry.

Business Office Representative — Associated Students, Inc., CSULB | *Oct 2024 – Feb 2026*

- Cut check-processing time 80% by implementing an upgraded financial system.
- Co-developed 2 annual operating budgets (ASI and USU, 2025–26) and reconciled statements for 20+ student organizations by verifying entries across departments.

Business Analyst Intern (Project Microsoft) — Association for Information Systems, CSULB | *Sep 2025 – Nov 2025*

- Delivered executive KPI dashboards for Microsoft presentations by building Power BI data models (DAX) and Microsoft Fabric ETL pipelines from raw audience and performance data.
- Shaped the team's pitch to Microsoft stakeholders by running correlation, market, SWOT and cost-benefit analyses.

Vice President of Finance — Association for Information Systems, CSULB | *May 2026 – Present*

- Fund weekly workshops and events for a 100+ member organization by managing a $5,000+ operating budget plus external grants.

PROJECTS

Tahúr (tahurgame.com) — Game Designer & Director · built with Claude, Anthropic's AI | *Oct 2026 – Present*

- Launched a free browser card game with real-time online multiplayer 12 days after the first build, and shipped 16 versions in 14 days, by owning the rules, progression, story structure, scope and every release call.
- Shipped a ~34,000-line TypeScript product with 349 automated tests, without writing code, by directing Claude through written specs, playtesting every build and sending back weak work, including a full visual redesign.
- Raised the win rate of skilled play over a fixed "stand on 17" strategy from 51% to 61% in AI simulations by redesigning the rules from playtester feedback: raise, call and fold, and final stands.
- Launched with zero real-money exposure and GDPR-ready accounts by setting the risk rules (earn-only coins, published odds, no ads or tracking cookies) and approving every deploy.

Is the American Dream Still Attainable? — AIS Annual Datathon 2026, team Tableau analysis | *2026*

- Placed 3rd at the AIS Annual Datathon 2026 by analyzing real income growth and regional inequality across the US in Tableau with a team.

EDUCATION

California State University, Long Beach

B.S., Management Information Systems & Accountancy — Expected May 2027 · President's List, five semesters
