PROFESSIONAL SUMMARY

Business Analyst and Python automation engineer — CSULB MIS & Accountancy dual-major (GPA: 3.87, President's Honor List every semester) with 1.5+ years of production experience; two live tools achieve ~96% and 95% processing time reductions across Power BI/Tableau dashboards, ETL pipelines, and SQL-driven financial analytics.

TECHNICAL SKILLS

Languages & Querying: Python (pdfplumber, PyMuPDF, pyautogui, openpyxl, customtkinter), SQL (joins, CTEs, aggregations), DAX, Excel (Pivot Tables, Power Query, VLOOKUP, INDEX-MATCH)

BI & Visualization: Power BI (DAX, Data Modeling, Custom Visuals), Tableau, Data Visualization, KPI Dashboard Design, Data Storytelling

Data Engineering: ETL Pipelines, Data Extraction & Transformation, Validation Pipelines, Microsoft Fabric, Workflow Automation, Microsoft Copilot & Prompt Engineering

Finance & Strategy: Financial Statement Analysis, Budget Planning, Financial Forecasting, Accounts Payable, Bank Reconciliation, Variance Analysis, SWOT

Platforms & AI: Microsoft Dynamics 365 Business Central, Microsoft Copilot, GitHub, Microsoft 365

PROFESSIONAL EXPERIENCE

Vice President of Finance | Association for Information Systems – CSULB May 2026 – Present

- Elected VP of Finance; oversee \$5,000+ operating budget and grant funding for 100+ member organization, driving financial tracking, reporting, and strategic resource allocation across all programs.

Lead Business Office Representative | Associated Students Inc. – CSULB Feb 2026 – Present

- Engineered two production Python automation tools (zero API): Snehin Check Request Helper (pdfplumber, PyMuPDF, pyautogui) cutting invoice processing from 3–5 min to under 10 sec (~96%); BC Journal Entry Bot (pdfplumber, openpyxl, pyautogui) reducing journal entry time up to 95% — both live in Business Central.
- Oversee financial documentation for 500+ campus organizations — accounts payable, purchase orders, bank reconciliations, auditing, and compliance verification.
- Automated financial extraction and reporting via Microsoft Copilot (70–80% time reduction); deliver SQL-driven budget analysis at 100% accuracy; redesigned workflows achieving 50% efficiency gain adopted team-wide.

Business Analyst Intern (Project Microsoft) | Association for Information Systems – CSULB Sep – Nov 2025

- Engineered 3+ Power BI dashboards using DAX and custom data models, delivering executive-ready KPI visualizations for Microsoft's cross-functional stakeholder team.
- Built ETL pipelines in Microsoft Fabric; conducted correlation analysis and market research directly shaping project strategy and final recommendations.
- Executed SWOT and cost-benefit analyses; co-authored and delivered business pitches to Microsoft representatives, securing stakeholder confidence.

Business Office Representative | Associated Students Inc. – CSULB Oct 2024 – Feb 2026

- Reduced check processing time 80%; automated data pipelines via Microsoft Copilot (70% reduction); co-developed 2025–2026 ASI and USU operating budgets; reconciled financials for 20+ student organizations.

PROJECTS & ACHIEVEMENTS

- Snehin Check Request Helper (Production)** — Python (pdfplumber, PyMuPDF, pyautogui) + Microsoft Dynamics 365 Business Central; ~96% processing time reduction, zero API dependency.
- BC Journal Entry Bot (Production)** — Python desktop app automating structured journal data entry from Docusign PDFs and CashNet Excel into Business Central; up to 95% time reduction.
- Is the American Dream Still Attainable?** — 3rd Place, AIS Annual Datathon 2026. Economic analysis of income growth, purchasing power, and regional inequality visualized in Tableau.
