

Wasi Mahin

Financial Data Analyst

Long Beach, CA | wasimahin@gmail.com | linkedin.com/in/wasi-mahin | github.com/wasimahin | wasimahin.com

SUMMARY

Financial data analyst pursuing a B.S. in Management Information Systems & Accountancy at CSULB (GPA 3.78). I own a finance function and automated it: the full accounts payable cycle for two entities, monthly internal audits across 500+ accounts at 100% data accuracy, year-end external audit support, and SQL-driven budget analysis. I also engineered the two production Python tools running daily inside Microsoft Dynamics 365 Business Central that cut invoice entry ~96% and journal entry up to 95%, with no API integration. Power BI dashboards, DAX models, and Microsoft Fabric ETL pipelines for a Microsoft-affiliated project.

EXPERIENCE

Lead Business Office Representative — Associated Students, Inc., CSULB | Long Beach, CA | *Feb 2026 – Present*

- Engineered two production Python desktop automation tools, both live in daily operations with zero API integration: Snehin Check Request Helper (pdfplumber, PyMuPDF, pyautogui) parses vendor invoice PDFs and auto-enters data into Microsoft Dynamics 365 Business Central, cutting per-invoice processing from 3–5 minutes to under 10 seconds (~96%); Business Central Journal Entry Bot (pdfplumber, openpyxl, CustomTkinter) extracts journal entries from DocuSign PDFs and CashNet Excel files with debit/credit structuring and object-code normalization (up to 95% reduction).
- Own the full accounts payable (AP) cycle for ASI and USU and financial documentation for 500+ campus organizations — 50–100+ vendor invoices weekly (up to 200 at peak) and ~5 POs/week across intake, GL coding, verification, and journal entry (every step except final payment approval) — and partner with 5+ departments to keep teams on accurate, up-to-date budget and reporting data.
- Perform monthly and ad-hoc internal audits across ASI and USU and support 2025–26 external year-end financial-statement audit prep — account reconciliations, supporting schedules, journal-entry review and correction, and data validation to resolve discrepancies before they reach the financials (100% accuracy across 500+ accounts).
- Deliver SQL-driven budget analysis and financial-statement review for ASI/USU annual budget creation; build automated extraction, validation, and reporting pipelines with Microsoft Copilot and prompt engineering, cutting processing time 70–80%.
- Trained 3 new employees on company accounting policies and procedures, authoring SOPs, reference guides, and scenario-based training sessions that standardized onboarding.
- Redesigned end-to-end office workflows, increasing operational efficiency 50% — standardized protocols formally adopted team-wide; mentor team members on financial systems and compliance.

Vice President of Finance — Association for Information Systems, CSULB | Long Beach, CA | *May 2026 – Present*

- Own the full financial lifecycle of a 100+ member organization: \$5,000+ operating budget and external grant funding across weekly workshops, seminars, and semester events.
- Analyze financial data to optimize fund distribution; drive improvements to financial tracking, reporting, and allocation processes for efficiency, transparency, and scalability.

Business Analyst Intern (Project Microsoft) — Association for Information Systems, CSULB | Long Beach, CA | *Sep 2025 – Nov 2025*

- Engineered interactive Power BI dashboards using DAX and custom data models, transforming raw audience and performance datasets into executive-ready KPI visualizations for Microsoft presentations.
- Built ETL pipelines using Microsoft Fabric and Copilot; conducted correlation analysis and market research that directly shaped project strategy and implementation decisions.
- Executed SWOT and cost-benefit feasibility analyses; co-authored and delivered business pitches to Microsoft representatives, securing stakeholder confidence.

Business Office Representative — Associated Students, Inc., CSULB | Long Beach, CA | *Oct 2024 – Feb 2026*

- Reduced check processing time 80% through implementation of an upgraded financial system, improving throughput during high-volume transaction periods.

Junior Accountant — Mizan Enterprise | Dhaka, Bangladesh | *Feb 2023 – Jul 2023*

- Managed and reconciled daily expenses in Excel, ensuring 100% ledger accuracy.

PROJECTS

- Snehin Check Request Helper** — Python RPA tool in daily production at ASI — github.com/wasimahin/snehin-check-request-helper
- Business Central Journal Entry Bot** — Python journal-entry automation in daily production — github.com/wasimahin/bc-journal-entry-bot
- “Is the American Dream Still Attainable?”** — Tableau economic analysis of income growth and regional inequality — 3rd place, AIS Annual Datathon 2026.

EDUCATION

California State University, Long Beach

B.S., Management Information Systems & Accountancy — Expected May 2027

GPA 3.78 | President's List, five semesters (Fall 2023 – Fall 2025)

SKILLS

Finance & Accounting: Financial Analysis, Budgeting, Forecasting, Accounts Payable (AP), Purchase Orders, Account & Bank Reconciliation, Journal Entries, General Ledger, Internal Audit, Audit Preparation, Internal Controls, Financial Reporting, Variance Analysis, SOP / Process Documentation

Languages & Querying: Python, SQL, DAX, Excel (Power Query, Pivot Tables, VLOOKUP), pdfplumber, openpyxl

BI & Visualization: Power BI, Tableau, Data Modeling, KPI Dashboards, Data Storytelling

Data Engineering & AI: ETL Pipelines, Microsoft Fabric, Microsoft Copilot, Prompt Engineering, Workflow Automation, Data Validation

Platforms: Microsoft Dynamics 365 Business Central, Microsoft 365, GitHub
